Script de présentation – Vidéo en Anglais

Lorenzo Derrez

October 19, 2026

1. Les critères de notations seront :
   Introduction
   Structure
   Conclusion
   Delivery
   Editing
   Creativity
2. Il faut que cela ne dure pas plus longtemps que 2min30
3. Il faut que chaque partie soit distinguable et compréhensible.
4. Il faut penser à des timecodes qui permettent de distinguer les différentes parties de la présentation.

I. 0.0s $\longrightarrow$ 0.30s : Introduction/Catchphrase

- Lorenzo Derrez, this is my Resume video
- 20 years old
- Computer Science Engineer
- I hope it will help you to understand better what kind of employee I am and what I what I can bring to your company.

II. 0.30s $\longrightarrow$ 1min : The Basics

- I was born and raised in France.
- Received a wonderfull education that allows me now to be open-minded, rigorous, organised, and disciplined.
- I graduated from French Baccalaureate with Highest Honors in Mathematics, Computer Science & Physics.
- At the same time I was following my journey in Basket-Ball. A sport I practiced and competed for a decade.
- These results fed my motivation to follow an Intensive Preparatory Programme in order to go into Engineering School in my country.

1min $\longrightarrow$ 1min30s : Summarize path

- In addition of my learning in Mathematics, Computer Science & Physics, I acquire lots of skills:
- For exemple I developped an **Autonomous Robot Task Management** in Python using machine learning skills.
- I also developped basic skills in Cybersecurity during an independant project.
- I am consistently developping AI's skills by focusing on independant project.
- Every project I created was posted like in a Company with benchmarks and reports.
- This is why I acquired lots of soft skills in LaTeX, Git, Organisation and Manadgement.

1min30 ⟶ 2min : Personnal details/Conclusion

- Also, I'm intersted in being a better version of myself.
- One exemple could be the fact that I used to read lots of books or listen to podcasts about important personnalities like athletes in order to learn some new skills and try to understand better what methods they used to won.
- This personnality helped me through my career to build a solid basis (sur laquelle vous pouvez comptez pour votre entreprise)
- (faire une phrase de conclusion/closing: thank the viewer and invite them to review your full written resume)

Tentative de rédaction complète

00:00–00:30: Introduction

Hi, I'm Lorenzo Derrez, and welcome to my video resume.

I'm 20 years old, and I'm a computer science engineering student from France at ENSEIRB-MATMECA.

I am currently looking for a three-month summer internship with your company.

In the next two minutes, I'd like to share my background, what I've been working on, and what I could bring to your team.

Let's start with the beginning.

00:30–01:00: Background

I completed my French Baccalaureate with highest honours, studying mathematics, computer science and physics.
I then joined an intensive preparatory programme for engineering school, where I learned to stay organised and work under pressure.

Alongside my studies, I played competitive basketball for ten years. It taught me discipline, teamwork, and how to keep going when things get difficult.

01:00–01:30: Projects and skills

During my internship at EY Luxembourg in 2024, I learned about pen testers' responsibilities and cybersecurity audits for corporate clients.

Through personal projects, I've used C, Python and machine learning to manage tasks for an autonomous robot.

I've also explored cybersecurity independently and continue to develop my AI skills.

My approach combines organisation, consistent effort and attention to detail.

I use Git to track changes, benchmarks to evaluate performance, and LaTeX to document my results.

01:30–02:00: Personal interests and closing

Outside my studies, I enjoy books and podcasts about athletes and their experiences.

I'm interested in how they build habits, handle setbacks, and improve over time.

I try to apply those lessons to my own goals, and I'd bring that same commitment to your team.

Thank you for your time. I would be pleased to answer any questions you may have about my Resume via my LinkedIn or e-mail.
